

**2009 MSAN Annual Conference
Pre-Conference Workshop June 23rd**

**Ian Smith:
The Motivated Classroom**

This interactive session demonstrates through the use of data, how student achievement is positively impacted through increased student engagement and motivation. Participants will explore a variety of research-based strategies designed to increase student self-motivation and deeper engagement in learning. Role plays will be used to explore beliefs that shape our students' ability to self-motivate. Participants will practice feedback and questioning techniques that increase both support and press.
